

000 Install Jupyter Raspberry

February 20, 2017

1 Getting started

Start from default Raspbian image:

- download
- copy to SD card
- login to shell

```
cd ~
git clone https://github.com/kraeml/ipython-notebooks.git
cd ~/ipython-notebooks/install
sudo chmod +x install.sh
sudo ./install.sh
```

Start Jupyter with the following commands:

```
jupyter-notebook -y --port=8888 --notebook-dir=/home/pi --ip=0.0.0.0 --no-browser
```

In a browser open <http://pi-ip:8888/tree>
